

NEWS RELEASE

NEW FACES APPEAR AT INTERBEE2006

InterBee2006 was held in Makuhari Messe from November 15th to 17th. More than 1,500 visitors came to our booth to see new lineup of our products.

<HR-7401 Uncompressed HD disc recorder>

Uncompressed data of RGB4:4:4 can be recorded. The maximum recording time is 30minutes in RGB4:4:4 and 60minutes in YUV4:2:2. 1080 60p also can be recorded (20minutes).

Because it is compact, very light (12Kg) and can be operated with DC it is very suitable for shooting.

The delivery will be started in December 2006.

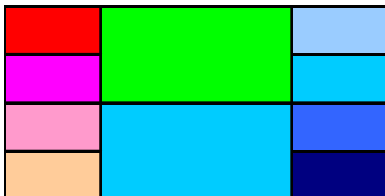

<HR-7401 with remote control box>

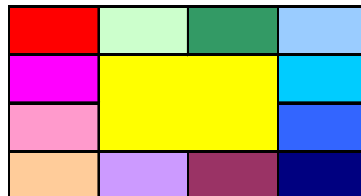

<HS-7042 16ch HD splitter>

16ch HDSDI can be output to one channel with flexible layout.

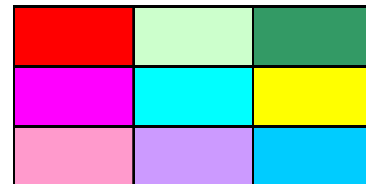

Following layouts that cannot be supported by our previous model (HS-7041-M) can be supported.

<1/4X2 on center>

<1/4 on middle>

<9/16>

<MAIN SPECIFICATION>

- 16HDSDI input and analog component (D-Terminal) output
- 32ch tally input
- compact size (1U)

The delivery will be started in the beginning of 2007.

<DM-3010-L/DM-3016-L LCD monitor with UMD>

DM-3010-L (8inch) and DM-3016-L (15inch) are LCD picture monitor that have a UMD function.

The UMD can be operated by our original application software (SP-3300) and it can be customized with customer's demand to be integrated in switcher.

Because monitor and UMD is assembled in one unit it can save space, power consumption and cost.

The delivery will be started in the beginning of next year.

<DM-3010-L/DM-3016-L>

<Windows application software SP-3300>
