PANASONIC LAUNCHES 4K VARICAM LT

THE PANASONIC BROADCAST TEAM ANNOUNCES THE NEXT GENERATION 4K CINEMA CAMERA, THE VARICAM LT CAMCORDER.

The VariCam LT camcorder incorporates the imaging 'DNA' of the VariCam 35 in a much more compact rendition. The VariCam LT inherits the same super 35mm sensor and superb imaging capabilities that distinguish the award-winning VariCam 35, but with significant reductions in size, weight and price.

We invite you to be one of the first to experience the new VariCam LT and see footage from both the LT and the 35. Please join the team for a short presentation on this class-leading product, followed by hands-on time and the opportunity to ask us any questions you may have.
